

Australasian Soft Matter Scattering Workshop 2017

Monday 06 February 2017 - Thursday 09 February 2017

ANSTO/AINSE

Book of Abstracts

Contents

| | |
|--|---|
| Welcome and an introduction to scattering | 1 |
| Small angle scattering analysis of nanostructure. | 1 |
| Introduction to light scattering | 1 |
| Specular reflectivity as a probe of interfacial structure | 1 |
| Combined Rheological Methods: Rheo-SANS and Rheo-SALS | 1 |
| Diffusing wave spectroscopy | 1 |
| Reconstructing particle shape from small angle scattering | 1 |
| Quasi-elastic neutron scattering in soft-matter | 1 |
| Soft diffraction | 1 |
| Molecular dynamics simulations of lipid bilayers and their associated structures | 2 |
| SANS as structural probe of self-assembled hydrogels | 2 |
| SAXS/WAXS beamline at the Australian Synchrotron | 2 |
| Malvern Zetasizer demonstration. | 2 |
| An introduction to lab based SAXS measurements | 2 |
| USANS at ACNS | 2 |
| Bilby, the time of flight SANS instrument at ACNS | 2 |
| Probing anomalous diffusion in frequency space | 2 |
| Characterising Lipid-based Drug Delivery Vehicles Using Small Angle Scattering | 2 |
| Modelling the structure of polymer brushes using neutron reflectometry | 2 |
| An introduction to responsive polymer brushes | 3 |
| Latest innovations for polymer characterization | 3 |
| Monitoring structural evolution of betaine surfactant systems using SANS | 3 |
| Size Evolution of [Pleaseinsertintopreamble][Pleaseinsertintopreamble] ³ -Peptide Self-Assembly | 3 |

| | |
|--|---|
| Tour of neutron beam instruments | 3 |
| Probing structures of soft matter under confinement using neutron reflection | 3 |
| Sample environments for soft matter | 3 |
| Protein deuteration as applicable to neutron scattering | 3 |
| Probing phase of liquid crystalline particles using small-angle X-ray scattering | 3 |
| Close | 4 |
| Instrument set-up session | 4 |
| Data reduction | 4 |
| Data analysis | 4 |
| Instrument rotations | 4 |
| Instrument rotations | 4 |
| Feedback session | 4 |
| Close | 4 |

Welcome and an introduction to scattering

Dr. GARVEY, Chris¹

¹ *ANSTO*

Corresponding Author(s): cjg@ansto.gov.au

1

Small angle scattering analysis of nanostructure.

Corresponding Author(s): s.prescott@unsw.edu.au

2

Introduction to light scattering

Corresponding Author(s): gary.bryant@rmit.edu.au

3

Specular reflectivity as a probe of interfacial structure

Corresponding Author(s): sph@ansto.gov.au

4

Combined Rheological Methods: Rheo-SANS and Rheo-SALS

5

Diffusing wave spectroscopy

6

Reconstructing particle shape from small angle scattering

7

Quasi-elastic neutron scattering in soft-matter

9

Soft diffraction

Corresponding Author(s): cjg@ansto.gov.au

10

Molecular dynamics simulations of lipid bilayers and their associated structures

11

SANS as structural probe of self-assembled hydrogels

12

SAXS/WAXS beamline at the Australian Synchrotron

Corresponding Author(s): stephen.mudie@synchrotron.org.au

13

Malvern Zetasizer demonstration.

14

An introduction to lab based SAXS measurements

15

USANS at ACNS

16

Bilby, the time of flight SANS instrument at ACNS

17

Probing anomalous diffusion in frequency space

Corresponding Author(s): slawomir.stachura@curtin.edu.au

19

Characterising Lipid-based Drug Delivery Vehicles Using Small Angle Scattering

20

Modelling the structure of polymer brushes using neutron reflectometry

Corresponding Author(s): timothy.murdoch@uon.edu.au

21

An introduction to responsive polymer brushes

Corresponding Author(s): ben.humphreys@uon.edu.au

22

Latest innovations for polymer characterization

23

Monitoring structural evolution of betaine surfactant systems using SANS

Corresponding Author(s): thomas.mccoy@monash.edu

24

Size Evolution of [U+1D6FD]^3-Peptide Self-Assembly

Corresponding Author(s): cebuchanan@students.latrobe.edu.au

25

Tour of neutron beam instruments

26

Probing structures of soft matter under confinement using neutron reflection

27

Sample environments for soft matter

Corresponding Author(s): normanb@ansto.gov.au

28

Protein deuteration as applicable to neutron scattering

29

Probing phase of liquid crystalline particles using small-angle X-ray scattering

30

Close

Corresponding Author(s): cjg@ansto.gov.au

31

Instrument set-up session

32

Data reduction

33

Data analysis

34

Instrument rotations

35

Instrument rotations

36

Feedback session

37

Close
