

EPICS User Meeting - Melbourne 2015

Sunday, 18 October 2015 - Sunday, 18 October 2015

Scientific Programme

Program is now available in the timetable page.

Experiment Control

Experiment Control, in particular the use of EPICS v4 (or other newer technology) in production systems: who is using it or planning to use it? what are the lessons learned? what is the future of older high-level frameworks?

Services and Future Technologies

Services such as V3 and/or V4 archivers (especially the ones dealing with big big data), scan services, physics services, etc.; as well as updates on future releases of EPICS v3 and v4.

Low-level Controls

Integration of new PLCs, custom instrument/hardware, hard real-time, DAQ equipment and/or timing

Tools & Clients

Latest developments on CS-Studio, Qt and of course... Web and Mobile
