

What is Model Based Systems Engineering?

Monday, 17 October 2022 16:10 (20 minutes)

Model Based Systems Engineering is something I wish I had discovered much earlier in my career. It is an effective way to help manage the architecture, interfaces and requirements of complex instrumentation projects. I will use this opportunity to provide a brief introduction and reflect on some of the ways we have used MBSE for our projects at AITC.
