

An Overview of Optical Engineering

Tuesday, 18 October 2022 15:30 (20 minutes)

Optical engineering combines the disciplines of physics, electrical engineering, and mechanical engineering. At AITC we design and integrate optical systems. This talk gives an overview of optical engineering techniques, some tools of the trade, and some tips and tricks that we have learned through building optical systems.

Primary author: Dr VAUGHN, Israel (AITC at the Australian National University)

Presenter: Dr VAUGHN, Israel (AITC at the Australian National University)

Session Classification: General

Track Classification: Joint/Plenary Topics
