Analysis of IR data (THz and IRM)

Tuesday, 21 November 2023 13:00 (1h 30m)

The session will begin with a general introduction to the processing tools available (OPUS, Quasar, and Cytospec on ASCI).

Following, a more detailed introduction into the open-source software, Quasar, including how to perform some common multivariate analyses such as hierarchical cluster analysis (HCA) and principal component analysis (PCA).

Presenters: KLEIN, Annaleise (ANSTO); BAMBERY, Keith (ANSTO)
