Terahertz and Far-Infrared Spectroscopy at the Australian Synchrotron

Thursday, 31 October 2024 13:30 (1 hour)

Dr. Dominique Appadoo will be introducing the Far-IR and Terahertz technique to the user community. The beamline has many environments and techniques available, so Dom will be introducing a wide variety of uses for Terahertz spectroscopy and its application to many science disciplines.

Presenters: APPADOO, Dom (Australian Synchrotron); BAMBERY, Keith (ANSTO)
