Introduction to k0-NAA

Wednesday, 16 September 2026 13:30 (3h 30m)

The training component of the k0 workshop is intended for those familiar with “classical” (relative) NAA who are new to the k0-method.

This training session outlines the fundamentals of the k0-method of standardisation, including the advantages and disadvantages compared to the classical relative method. Equipment and software requirements will be described.

Presenter: Mr STOPIC, Attila (ANSTO)

Session Classification: Training

Track Classification: Fundamentals of k0-NAA
