

# USER MEETING 2016

24-25 NOVEMBER

National Centre for Synchrotron Science

Ansto

Contribution ID: 216

Type: Poster

## GeoPIXE update at XFM

GeoPIXE is the primary X-ray fluorescence analysis software used at the XFM beamline. Several new developments in GeoPIXE will be outlined, such as fitting for multiple sample matrix phases. Information will be given regarding a GeoPIXE workshop planned for 2017. User input for workshop topics is welcomed.

Keywords or phrases (comma separated)

XFM, GeoPIXE, analysis, technique development

Are you a student?

No

Do you wish to take part in the Student Poster Slam?

No

Are you an ECR? (<5 yrs since PhD/Masters)

No

What is your gender?

Male

Primary author: Dr HOWARD, Daryl (Australian Synchrotron)

Co-authors: Dr RYAN, Chris (CSIRO); PATERSON, David (Australian Synchrotron); Dr DE JONGE, Martin (Australian Synchrotron)

Presenter: Dr HOWARD, Daryl (Australian Synchrotron)

Track Classification: Technique Development
