

Maintaining and calibrating your equipment - what methodologies and systems exist?

Wednesday, 29 November 2017 16:42 (6 minutes)

On 3 July 2017 ANSTO went live with a major new system known as SAP Ae (Ansto Enterprise). This one stop shop covers all aspects of asset management planning, including procurement, maintenance, calibration, asset renewal, customer relationships and even HR. This system has been primarily designed for the commercial side of ANSTO (Nuclear Medicines, Silicon Irradiation and Minerals divisions). issues, challenges and opportunities of using such a major piece of software for the ACNS' neutron scattering instruments will be discussed.
