

ISIS Mechatronics challenges and success undertaken in the last year

Thursday, 30 November 2017 09:50 (20 minutes)

This presentation covers the particular mechatronics successes and challenges undertaken at ISIS. The recent work completed on our Phase II beamlines including the installation challenges of integrating a motion safety system into our new IMAT beamline.

How we have built our multi skilled mechatronics team up over the last year and how the team interacts smoothly with our operations and computing teams. What the future holds for mechatronics at ISIS.
