ITER and CODAC Status Update

Wednesday, 14 November 2018 11:00 (20 minutes)

Within the ITER project, 35 nations are collaborating to build the world's largest fusion facility in the South of France. Most contributions are in-kind - integration of more than 170 plant systems will be the main challenge when building the control system, which is using CODAC Core System, based on RedHat Enterprise Linux, EPICS and ITER specific tools.
