Integration of ESS Cryoplant into EPICS

Thursday, 15 November 2018 16:35 (5 minutes)

European Spallation Source (ESS) selected Linde Kryotechnik to deliver a large and complex cryoplant. For ESS it was important that the integration into EPICS is done in a way consistent with other subsystems. Cosylab was able to provide the missing link between cryoplant supplier and ESS, and thus adapt the industrial solution to the custom requirements of the ESS EPICS environment.
